Since 1977, Asian Pacific Counseling and Treatment Centers has been serving Asian and Pacific Islander groups throughout Los Angeles County by providing a full range of mental health programs. The mission is to meet the continuously growing mental health needs of our diverse Asian Pacific community through the development and efficient management of culturally and linguistically appropriate mental health services. APCTC services include: outpatient mental health services to adults, children, and families; school-based interventions; a full range of rehabilitation services, including adult day treatment, community living program, vocational rehabilitation, and housing services; a CalWORKS program; adult-targeted case management; and various community outreach programs. APCTC joined the SSG family in 1990, and has continued to grow significantly over the years.
